

Konsistenzbedingungen

❶ $\Sigma_E\text{-sicher} \wedge \Sigma_E\text{-lebendig} \implies \Sigma_S\text{-sicher} \wedge \Sigma_S\text{-lebendig}$

❷
$$\begin{array}{l} \Sigma_E\text{-sicher} \implies \Sigma_S\text{-sicher} \\ \wedge \Sigma_E\text{-lebendig} \implies \Sigma_S\text{-lebendig} \end{array}$$

❸ $\Sigma_E\text{-sicher} \implies (\Sigma_S\text{-sicher} \wedge (\Sigma_E\text{-lebendig} \implies \Sigma_S\text{-lebendig}))$
